Chitosan Hemostasis Pad

ez CLOT

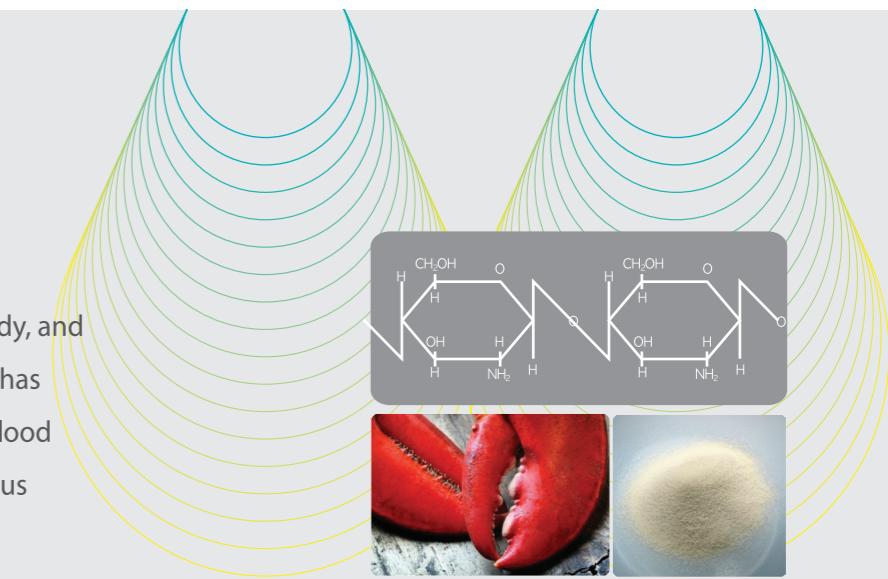

Key Features

- 1 ezCLOT is fabricated from chitosan which helps more effective and quick hemostasis, and non-woven fabric pad can absorb blood quickly and efficiently.
- 2 ezCLOT offers antibacterial effect based on the antibiotic experiments.

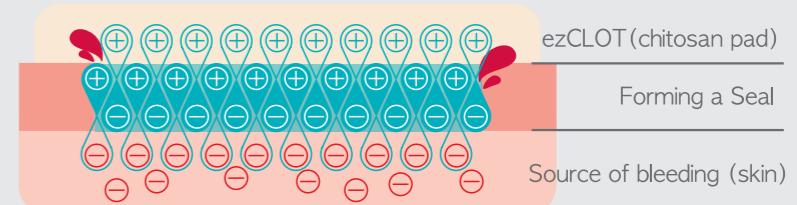

The Effect of Chitosan

Chitosan have biocompatibility inside the body, and antibiotics and anti-fungal properties. Also, it has anti-cancer effect and promotes clotting of blood to help hemostasis, and immunize against virus with respect to an antibody forming process.

How does Chitosan stop the bleeding?

"Positive charges in Chitosan attract negative charges in red blood on the wound, which quickly makes a seal over the source of bleeding"

Specifications

Long Band Type Model. CLL 1403

Pad Type Model. CLP 0303
CLP 0505
CLP 0707
CLP 1010
